

Custom reserve power

CUSTOM RESERVE POWER

Our product selection also includes standardised outdoor metering centres with a reserve power connection and socket outlets for use on farms. Our product enables a more secure and easier solution for network change-over. Our selection covers centres with a rated flow of 50A and 80A, all with a cabinet category of IP34. Ask our sales staff about reserve power centres over 80A that we can provide for special centre structures.

The centres include a network-0-generator selector switch, the required number of miniature circuit breakers and residual current devices and plenty of reserve space. Mounted in the centre are an Plugreceptacle for the supply of reserve power and a 5 x 16A power contact socket and 16A Schuko socket outlets, both of which are protected with a 30mA residual current device. An LED indicator light module indicates the voltage in the network. We have aimed to facilitate installation and use for multiple purposes with wire feed-throughs and a rain shelter that are part of the delivery.

CUSTOM RESERVE POWER

SSTL number	Name	Product description	In	Installation
R10280	MKV1120JAL 80A, Varavoimakeskus	MKV2020		
R10285	MKV1120 80A, Varavoimakeskus	MKV2020		
R10290	MKV700, Varavoimakeskus	MKV 2020		

Product info

POK backup power centers are suitable as main and metering centers for small properties and for electrical distribution during construction. The centers are made from hot-dip galvanized steel sheet, which, together with the correct design, ensures a sturdy and safe structure as well as usability. Our range includes centers with nominal currents of 50A and 80A, all of which have an enclosure rating of IP34. Inquire from our sales department about backup power centers over 80A, which we implement in special center structures. Color shade RAL7024.
